AREA Science Park – Trieste (Italy)

“EU Policies for transnational mobility and research”

The objective is to provide participants with specific advice and guidance on EU strategies and policies for the development and implementation of ERA, the European Research Area. The objective is to contextualize the new policies for higher education in the framework of the Bologna Process.

Contents: The European Commission has conceived ERA, the European Research Area, as a pre-requisite for the realization of a new innovation and competitiveness phase in Europe, allowing the best brains to work together. ERA has the objective to build a common market for knowledge, research and innovation, allowing researchers to move freely and research centres and enterprises to cooperate beyond borders, thus increasing growth potential. These issues will be dealt with together with those related to mobility in the EHEA, the European Higher Education Area, and the state of the art of the Bologna Process.
