As in the recent years, DAAD is again able to offer a 3-week language course with professional and cultural program at the Technical University of Munich for Southeast European graduates and doctoral candidates from our network. The aim of the course is to connect the active students and young scientists with other networks and to offer them an intensive German course together with an attractive program with technical, cultural and EU political events. The course will take place in Munich in the period from 15th July till 04th of August 2013. Due to the difficult situation for accommodation in Munich, 25 places in total, in four-bed rooms, can be booked for the participants. Because of this, DAAD can reserve only 3-5 places for the young academics from our network.

Please note that the completed applications must be sent to the central coordination office in Bochum by the 02th of April .

This announcement will be posted on the DAAD website www.daad.de/stabilitaetspakt
